Introducing the TICKLESS® technology and the TICKLESS® series – the new generation of ultrasonic tick and dust mite protection for your family

Evidence-based, non-toxic products for the freedom in nature and at home

ProtectOne LTD. was founded in 2010, with the aim to provide a non-toxic solution against ticks and dust mites. We focus on evidence-based solutions that are harmless for any user and also to nature. Our product portfolio within the TICKLESS® and MITELESS® brands feature the newest technology and provide the best solution against parasites such as ticks, fleas and mites. ProtectOne Ltd's headquarter is in Budapest, Hungary, with manufacturing facilities in Hungary.

Our goal is to provide the most reliable and efficient environmentally friendly tick, flea and dust mite repellents for everyone in the family, including our pets. Our products are present in 52 countries on five continents. Today we are Europe's No.1. non-toxic parasite repeller provider, stretching over 50+ countries in five continents.

Tickless technology

The Tickless technology is based on science and underwent rigorous testing and was proven effective by a clinical study at the School of Veterinary Medical Microbiology and Infectious Diseases Laboratory at the University of Camerino, Italy.

It works by emitting a series of ultrasound pulses that are harmless and imperceptible for both humans and animals but disturb ticks and fleas, repelling them from pets and people and keeping them away. The ultrasound technology it is absolutely harmless for humans, and pets and wildlife. The device is clean, safe, ecologically friendly, chemical free and does not emit fragrances or sound.

TICKLESS Baby is an ideal solution against ticks right from the baby's very first days spent outdoors. Simply attach the device securely to your child's clothing, and it will keep ticks away for 6-12 months after activation, allowing your whole family to enjoy nature without care or worry. This is the first tick and flea repellent which is safe to use for newborn babies, pregnant women, ill or old people.

TICKLESS®

ULTRASONIC TICK AND FLEA REPELLER

TICKLESS® is always on the innovative edge, our company started a large manufacturing development in 2016 in order to be able to create more advanced products for our partners. We love what we do, and we believe in our product's effectiveness as well as in its success. This differentiates us from our competitors.

Last year our TICKLESS Baby & Kid products won the Most Innovative Child and Baby Safe Tick Repellent award in LuxLife Magazine's Parent and Baby Award.

Direct contact with our customers is a way of thinking and moving forward. But we always cooperate with our partners to see their ideas and suggestions for the future.

Prevent Lyme disease and other serious illnesses with TICKLESS® to enjoy nature together without any worries!
