Promoting an interactive and healthy learning environment with BenQ

BenQ's interactive whiteboards offer protect thanks to germ-resistant screen surface and touch pens

Oberhausen, 19 May 2022 – BenQ, the education expert, will be presenting its solutions specially developed for the education sector to create an interactive, healthy learning environment from 07 to 11 June at didacta in Cologne. In line with its motto #ZUKUNFTSTARTEN, everyone who wants to embark on the digital education path can experience BenQ's practice-oriented products live at stand A069 in hall 6.1. The largest trade fair for education is the ideal platform to find out about the possibilities of the digital transformation and to receive individual advice. BenQ will present its latest germ-resistant RM03 series Interactive Boards as well as demonstrating the advantages of wireless presenting with the innovative BenQ InstaShare Button Set TZY31 and providing valuable tips for inspiring use.

BenQ RM03 series: Innovative technologies and intuitive operation

The RM8603 (86"), RM7503 (75") and RM6503 (65") interactive whiteboards facilitate digital classroom design thanks to intuitive operation and innovative technologies. With their pre-installed, practice-oriented software, integrated speakers, microphones and extensive connections, the 4K UHD displays are also ideally positioned for video conferencing. In addition to the screen surface, the touch pens supplied with the interactive boards have, for the first time, also been manufactured with a germ-resistant,

durable silver-ion coating. With this, BenQ adds another feature to its wide range of ClassroomCare® technologies, which serve to prevent germs, improve air quality and protect the eyes, putting the focus on the teachers' and pupils' health.

BenQ InstaShare Button Set: For wireless screen sharing

For the first time at didacta 2022, BenQ will present its latest InstaShare Button solution TZY31 for wireless screen sharing with just one click. The button connects conveniently via USB-C to a camera, notebook, smartphone or tablet and wirelessly shares the screen content of up to 9 participants via the large-format BenQ display at the touch of a button. This enables exciting lesson design and invites pupils in the classroom to actively participate.
