Experience digital education:

BenQ invites you to attend classes at didacta

- Teacher and media consultant Philipp Wartenberg gives practical tips for teaching with BenQ's digital solutions -

Oberhausen, 31 May 2022 – When didacta, the largest trade fair for the education sector, takes place in Cologne from 7-11 June 2022, BenQ will be there live as one of the leading education partners with its innovative complete solutions in the digital school sector. At stand A069 in hall 6.1, BenQ will be presenting its products and solutions for homeschooling, distance learning and, of course, face-to-face teaching. The BenQ Education Team will be happy to advise teachers and those interested in going digital on the choice of a suitable solution and provide valuable tips on the use of its latest germ-resistant Interactive Boards of the RM03 series as well as the innovative BenQ InstaShare Button Set TZY31 for wireless presentation of teaching content.

Entertaining lessons bring the digital classroom to life

In short teaching sessions on various subjects, visitors can be inspired by an exciting and varied programme at the BenQ stand A069 in hall 6.1 and find out about the possibilities of a digital classroom. Guest speaker Philipp Wartenberg, media consultant and teacher of German, geography, politics and computer science, has been dealing with contemporary learning in a culture of digitality since his studies and will report on his experiences and on what added value the use of digital media can have for the everyday life of teachers. Download the timetable [here](#).

Promoting healthy learning with BenQ's interactive whiteboards

Visitors to the BenQ stand A069 in hall 6.1 will be able to experience the RE03 series

Pressinformation

of interactive whiteboards live on site. The boards are intuitive to use and feature a wide range of ClassroomCare® technologies that help prevent germs, improve air quality and protect the eyes, promoting both teachers' and students' health. The new BenQ RM8603 (86"), RM7503 (75") and RM6503 (65") models feature a durable germ-resistant screen surface with matching germ-resistant touch pens that have a durable silver ion coating.

Presentations without tangled cables thanks to the BenQ InstaShare Button Set

The latest InstaShare Button solution TZY31 from BenQ enables wireless screen sharing with just one click. The button is conveniently connected via USB-C and wirelessly mirrors the screen content, e.g. from a camera, notebook, smartphone or tablet, at the touch of a button. Up to nine participants can simultaneously collaborate in an exciting and inspiring way via the large-format BenQ display.

Initiative #ZUKUNFTSTARTEN

With the #ZUKUNFTSTARTEN initiative, the BenQ Education Team, as a competent solution provider, accompanies all educational institutions that would like to embark on the digital path together with BenQ, from initial planning to implementation and support. Visitors are welcome to the BenQ booth to receive individual from the Education Team.

More information on BenQ's education solutions is available at: <https://www.benq.eu/de-de/campaign/digitaleducation.html>

■ **BenQ B2B short profile**

BenQ is one of the world's leading manufacturers in the field of digital display and projection technology. The B2B portfolio consists of innovative complete solutions for the modern working world as well as for digital schools - paired with comprehensive services, competent advice and individual training. User-oriented solutions for visualising and editing digital content open up completely new possibilities for collaboration for companies and educational institutions. With BenQ solutions for displays, projectors and presentation systems, collaborative, creative and efficient meetings are easy to implement. Teaching in the digital classroom becomes more effective and inspiring with BenQ's easy-to-use interactive whiteboards, ultra-short-throw projectors and presentation solutions.
