

Pressemitteilung

## **ElektroMobilität NRW at the polisMOBILITY in Cologne**

**As the main contact for electromobility in North Rhine-Westphalia, you will find us in Hall 1, Stand C-022 / E-025 from May 18 to 21, 2022**

ElektroMobilität NRW is the umbrella brand of the Ministry of Economic Affairs Innovation, Digitalization and Energy of the State of North Rhine-Westphalia (NRW), under which all NRW activities in the field of electromobility are bundled. Since 2022, we have been working on the further development of electromobility in NRW under the umbrella of and in close cooperation with the newly founded state company "NRW.Energy4Climate". Together with our partners, we are working on the transformation of the mobility sector to help achieve the state's climate protection goals.

### **Comprehensive information on the topic of funding**

ElektroMobilität NRW is the universal contact in North Rhine-Westphalia for all concerns related to electromobility. One focus of its activities is to provide comprehensive information on current funding programs for electromobility - be it vehicles, charging infrastructure, consulting & concepts or research & development.

### **Free services for municipalities and companies**

In addition to information on current state and federal funding programs, we support companies, tradespeople and municipalities in their implementation of electromobility. We facilitate events, workshops, citizens' days, trade fairs and we hold seminars and lectures. In addition to the development of target group-oriented information materials, ElektroMobilität NRW connects actors of business, society and politics in the field of electromobility.

### **Contact**
