

2022

GOLD MEDALS YEAR WITH Sustainable, Cleaner, Greener Future with Solar Panels

Our three new products- DELICACY SALAMI, BEEF SUDJUK AND LUKANKOV KOLBAS RODOPA were the three winners awarded with a gold medal at last year's edition of the largest specialized exhibition in the Bulgaria – MEATMANIA 2022.

Meanwhile in 2022 the company has invested in sustainable Solar Powered Energy System with capacity of 1.5 mwh.

As a renewable source of power, solar energy has an important role in reducing greenhouse gas emissions and mitigating climate change, which is critical to protecting humans, wildlife, and ecosystems.

The meat processing company "EKO MES" Slt. is located in the picturesque hills of Sredna Gora in the village of Velichkovo, Bulgaria. Here in the land of the ancient Thracian state of the Odriusian Kingdom, we produce our products according to authentic Bulgarian recipes.

Our production includes a wide range of durable cooked-smoked and raw-dried sausages and delicacies.

We control all critical points of the production process from input of raw materials, hygiene, working conditions, transport and delivery of the product to the end customer. The company introduced the system for quality control and production safety - IFS FOOD v.7 October 2020.

Our goal is to preserve the traditional taste of the products offered, offering our customers consistently high quality. All production processes are carried out with the most modern equipment under constant technological control.

We at "EKO MES" Slt. constantly strive to offer our customers products that meet their requirements for a healthier and greener life.

We are proud of our achievements in 2022 as we have both received gold medals for the quality of our products and we also do have invested for a safer and cleaner option for a power source for the production of them.
