

## MAKE IT YOUR MAIN SQUEEZE!

### Darbo innovates your breakfast buffet

When it comes to big challenges, it pays off to start small. This is especially true in the restaurant sector. An inviting presentation and high hygiene standards will draw guests to your breakfast buffet. Dispenser systems for cereal, juice and other goods are helpful tools. Unfortunately, many such systems require a great deal of maintenance and cleaning, stripping service staff of time for their most important work: customer service. Of course, guests also prefer systems that are easy to use.

This is why Darbo has come up with something special for its fruit spreads and honey: the Darbo Dispenser. It is a handy system that allows you to provide dispenser bottles for Darbo fruit spreads and honey at your buffet hygienically. Your guests can help themselves to a portion of the spread by pushing the lever – a simple, low-tech solution. Six different flavours of Darbo fruit spreads are available in a 900-gramme dispenser bottle. Our blossom honey in a 1000-gramme dispenser bottle completes the selection.

The Darbo Dispenser was designed specially for the new dispenser bottles. With its neutral, white design and classic, clear lines, it blends perfectly into any hotel that needs a dispensing solution for its buffet. Durable materials, such as aluminium and stainless steel, ensure stability and a long service life. The dispenser is intuitive and easy to operate. It does not need to be disassembled or cleaned when you replace the dispenser bottles. Once a bottle is empty, it can be replaced in a matter of seconds. All surfaces are easy to reach and wipe. By the way: the dispensers are sold individually. This allows you to line up and present as many dispensers as suits your individual buffet situation.
