

Fruit Purees, Juices and Concentrates from Aseptic Peruvian Fruit – a Success Story

Since 2018, a close, trustful and friendly cooperation has developed between Carrière and Aseptic Peruvian Fruit, which has culminated in a pan-European marketing of organic ginger and organic turmeric juice.

The aseptically packed *passion fruit juice* as well as *mango purees* in the varieties Chato de Ica, Criollo and Kent, *pomegranate and physalis juice*, *pineapple*, *guanábana*, *blueberry* and *sweet potato puree* round off the colorful and diverse portfolio of Aseptic Peruvian Fruit. The fruits are gently pasteurized and filled in a wide range of packaging sizes (bag-in-box of 3, 5 and 20 kg, barrels of 200 or 220 kg net).

We follow „best practice“ in the procurement of all fruits in terms of biodiversity as well as sustainable management: "We are friends of the fields and the fields are our friends".

As a member of the organization *SGF (Sure Global Fair)*, Aseptic Peruvian Fruit is committed to voluntary self-regulation. SGF certificates give us additional security as a business partner, ranging from product safety to authenticity and traceability to *GMP (Good Manufacturing Practices)*. The products manufactured by Aseptic Peruvian Fruit and marketed by Carrière comply with the *AJN CoP (Code of Practice)*. In addition, the company is BRC, BIO and kosher certified.

Carrière is YOUR partner in Europe when it comes to purees and juices from Aseptic Peruvian Fruit. Please do not hesitate to visit our joint booth in hall 8.1. E18.

We would be happy to take you on a sensory journey to Peru. Let yourself be inspired by the products – we will be happy to help you with words and deeds!
