

Fruit Powders and Pastes - a Success Story

For several years now, we have been working on expanding our product portfolio to include powders and pastes, thus offering further forms of processed fruit and vegetable.

Sylvestre - Ingredientes Naturais from Brazil is one of our reliable partners in this respect. Increasingly popular are **powders with and without carriers, organic or conventional, dried in various ways (including spray-dried, freeze-dried, roller-dried and air-dried)** for various applications in beverages, ice cream, baked goods, food supplements, breakfast cereals and confectionery. Take advantage of our expertise to find the right material for your application.

Are you looking for a more exotic kick? Then let's talk about **cupuaçú, açai, acerola, jaboticaba, maqui berry, haskap berry, baobab, camu camu, date**, etc.
Or would you prefer the classic **apple, orange, strawberry, raspberry** etc.?

We also offer **fruit pastes with low water activity**. The bestsellers are date and apple, particularly popular for baked goods, bars and confectionery.
