Do not throw on the road

Our beers are flavoured with superfoods: that superfoods in our beers are sources of vitamins, minerals and antioxidants and grow naturally on earth.

By combining them with our ancient Belgian know-how, we can offer a wide variety of flavours that will definitely satisfy the taste buds of the most discerning and the curious beer lovers. Our range of 7 beers allows you to benefit from the aromatic virtues of 13 of these superfoods.

CREAMY

## NATURE BREWTHERS

Being Nature Brewthers means limiting the negative impacts of our actions to a minimum. Our PEALCE beer with seeds of peace is our best ally in preserving the environment. The project with which it is associated leads us to plant fruit trees in our partners' green plots. Thanks to this, the carbon impact of the production of our beers is as compensated for as possible. Why limit ourselves to Belgium? In partnership with the association Graine de Vie, Superfood Beers is also involved in reforestation projects in Madagascar, Togo and Benin ——— **THAT'S WHAT**

**BEING NATURE BREWTHERS IS ALL ABOUT**
