

FAM STUMABO launches the SureTec 240 featuring the SureCut Unit Discover this robust heavy-duty dicer for a wide variety of fruit and vegetables at Anuga Foodtec

The SureTec 240 is the latest addition to FAM STUMABO's wide range of fruit and vegetable cutters. This high-capacity machine guarantees peak production in heavy-duty production circumstances, ideally suited for frozen vegetable and large fresh vegetable processors. Reliability and durability are essential elements.

The cutting machine features the unique concept of the SureCut Unit (SCU). The SCU allows the cutting components to be pre-assembled in one piece and perfectly adjusted, away from the machine. It allows even non-technically trained operators to change and install the cutting tools on the machine in a very fast, uncomplicated, and error-free manner.

In this way, the new SCU concept assures cutting accuracy from the very first moment of every new production run, maximizing production uptime.

Wide variety of applications

The SureTec 240 allows processors to dice a wide variety of softer fruit products such as mango, apples, pears and strawberries. Also, harder root vegetables like carrots, turnip and celeriac fall within the possibilities of the cutting machine. Other successful products are beetroot, broccoli, onions and potatoes.

Large drum limits the need of pre-cutting

The machine is equipped with a large drum accepting a maximum infeed product of 240 mm (9.44") in any dimension. This ensures a reduction of the need for pre-cutting of the products.

The SureTec 240 is designed to permit thorough cleaning. It has slip holes in the drum for the removing of product residue and a rounded tube frame. The open cutting zone is easily accessible for fast cleaning and visual inspection.

The durable components that are used in the machine assure a long service life. The slipper clutch and slip detection system will avoid expensive downtimes and prevent the parts from severe damage or wear. The drive zone is quickly accessible thanks to the hinged electrical cabinet.

Visit the FAM STUMABO booth at Anuga FoodTec in Hall 10.1, Booth E050-F051, to see the SureTec 240 and to learn more about its features.

About FAM STUMABO

FAM STUMABO focuses on the development of industrial cutting machines and the manufacturing of precision knives for the food industry. We provide customers with the solutions they need for the cutting, slicing, and dicing of fruit, vegetables & nuts, cheese,
