

FLAVOURING SYSTEM FOR LABORATORY Mod. AROMAT-BI

AROMAT-BI is a counter-top flavoring appliance, created to satisfy the requests of artisanal producers and laboratories who carry out tests for the industry.

The machine is fully built with stainless steel AISI 304 and can flavor batches up to 400/500grams at a time.

It is an autonomous system and it includes :

Compressor

Nozzle for nebulizing the oil

Doser to distribute the flavours in powder.

HMI touch screen panel

Thanks to the HMI it is possible to set the quantity of product to be flavored, the percentages of oil and powder to be sprayed and sprinkled on the product.

The recipes may be saved on the panel ready to be re-used for the next batch.

The Aromat-BI needs single-phased current 220V
