

FORPAK

Modernize and optimize your productivity

Customized food automation that reduces labor and increases food safety and up-time.

Industries We Serve

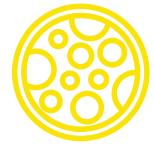

30+ YEARS

Baked Goods

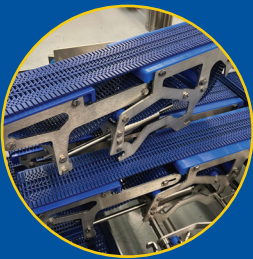

Protein

Pizza

Product Benefits

Less Downtime & Increased Production

Equipment engineered with proven designs that are durable and modular in design to minimize downtime and increase throughput.

Increased Food Safety

Equipment that meets the highest food hygienic standards with simple-to-clean surfaces and internal parts for efficient sanitation, increasing food safety.

Reduce Labor Cost

Enhance efficiency with food automation, maximizing uptime and minimizing labor costs.

Engineered Customized Solutions

Our team of design engineers are experts in creating custom solutions to your specific needs, space limitations and requirements.

Smart innovations that check quality, lane, stack, and convey your products to downstream packaging.

Laner

CREATING PRODUCT LANES & ROWS

- Transfer product into lanes & rows from any product presentation
- Can be sold as an independent machine
- Processes up to 100 pieces/minute/lane
- Can be manufactured with 2 to 10 lanes
- Independent belt control up to six lanes
- Modular plastic or SS belting
- Wash-down design
- Stainless steel construction
- Custom-engineered solutions

Stacker

FAST AND EFFICIENT

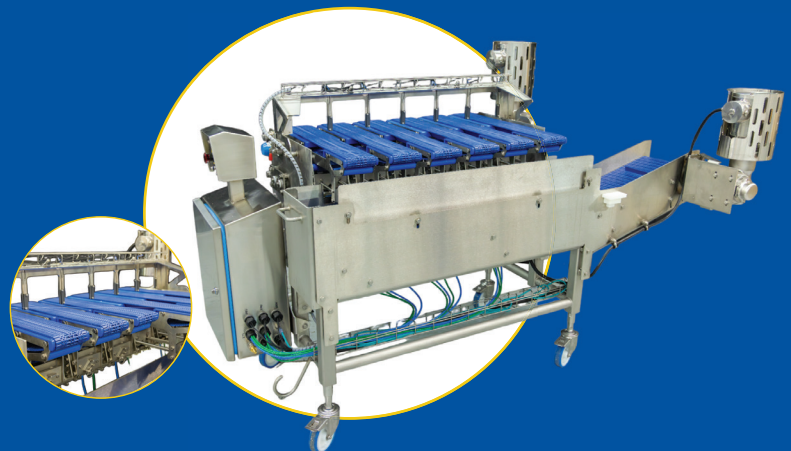

- Stacks different shapes
- Full wash-down capability
- Stainless Steel construction
- All-Electric option available
- Rotating Pendant HMI available
- Multiple recipes for multiple SKUs
- Custom-engineered solutions
- Can be manufactured with 1 to 10 lanes
- Servo-controlled actuators for building stacks
- Allen-Bradley PLC & PanelView HMI controlled

Reject System

QUALITY ASSURANCE

- Modular design
- Reduced setup times
- Stainless Steel Construction
- Better overall hygienic design
- Multiple recipes for multiple SKUs
- Processes up to 100 pieces/minute/lane
- Can be manufactured with 1 to 10 lanes
- Custom-engineered solutions
- Machine Vision available for most products
- Tool-free removal and installation of Reject Module
