

New Products – International furniture fair IMM Cologne 2024

Udina

The expressive solid-wood table is available with tabletop in a superelliptical, rectangular or round shape, and is supported by a concrete base. As a sculpturally shaped central base it provides outstanding stability through its own weight, allowing for overhanging tabletops of up to 280 cm in length. The result is a table with maximum legroom and a fascinating sense of visual lightness. The concrete base is available in either light or dark grey. The two-part construction also has a functional purpose, helping to make transport, handling and assembly of the table much easier. All wood types in the Girsberger range are available for the dining table version.

Design: Mathias Seiler

Udina table with oval concrete base in light and dark grey and with a round tabletop and matching round base.

Calina

The Calina design is distinctive for its rounded and organic forms. It also offers a high level of comfort – the curved backrest encloses the upper body like a soft embrace, offering well-fitting support for a cosy sitting experience. The upholstery on the seat and backrest adds to the softness of the overall impression.

This is a model of chair that meets the demands of various different types of use thanks to a wide selection of frame designs. The swivel option with four-star aluminium feet offers more freedom of movement at the conference table, and the flat version is also fitted with a return mechanism. The option with a height-adjustable five-star base on castors makes Calina an attractive swivel chair for temporary work or as an appealing office chair when working from home.

Design: Markus Dörner

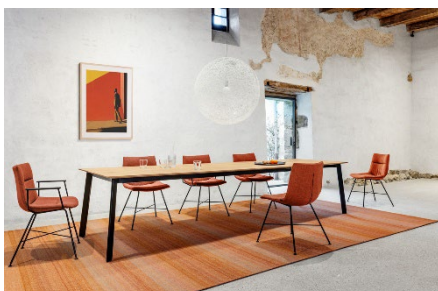

Two backrest sizes and upholstery types are available: Calina with simpler upholstery, a narrower backrest and the resulting advantage of stackability, or the “Comfort” option with a bigger backrest and the thicker vertical folded details of the upholstery fabric. This version offers an especially soft and comfortable seating experience.

Liola

The Liola solid wood table can be extended by up to 100 cm thanks to its side extension. The table top and the inlay are made from the planks of a long tree, so that the lengthwise grain in the solid wood merges into the inlay without interruption. A damped swing-out mechanism makes handling easier. Liola is available in the various types of wood in the Girsberger range, 100 cm wide and optionally 180, 200, 220 or 240 cm long. The frame is made of black-coated steel.

Design: Mathias Seiler

Cina

The Cina lounge chair is an easy-to-move piece of furniture that is ideal for use in reception areas, communal zones, public or private areas. A leather handle on the rear of the backrest serves as a clear sign that Cina – thanks to its integrated castors – can be moved effortlessly from one place to another. Sebastian Herkner created a restrained sculptural form that offers a cosy sitting experience with a backrest that encloses the body, and a comfortably upholstered seat. The outer shape of Cina is reminiscent of an inverted truncated cone. Inside, there is an extremely comfortable seating area with soft cushions. The backrest, which gently envelops you, creates a particularly cosy atmosphere. A stool is also available.

Cina lounge chair – complemented by the Tala side table (pictured left) and matching stool (pictured right)

Tala

Tala is a table range specially designed for the seating heights of lounge chairs and sofas. The compact side table can be used to accommodate drinks, documents, or even a laptop that needs to be conveniently within reach. The Tala round table is well-suited for relaxed encounters in the lounge, or for informal meetings. Both tables incorporate a round receptacle for writing instruments and accessories, created as a result of the steel tube protruding through the tabletop. The frames are made of black coated steel, while the tabletops can be either solid oak, solid walnut or white or black high-pressure laminate (HPL) panels.

Tala with integrated round receptacle für writing utensils: as a side table and as a round table for small meetings

Ategra

This latest swivel chair from Girsberger combines the features of an ergonomic functional swivel chair with visual lightness, fitting perfectly into modern and relaxed working environments and for working from home. The chair has all the important functions: The compact synchronised mechanism ensures plenty of movement when sitting and automatically adjusts to the user's weight. The seat is height and depth-adjustable and the backrest is also height-adjustable for precise support of the lumbar region. Ategra is available in various frame designs in aluminium and plastic. The backrest bar is made of plastic and available in black or white.

Design: Alejandro Valdés

Ategra is available in various frame designs in aluminium and plastic, and with a choice of black or white for the plastic backrest bar.

About Girsberger:

Founded in 1889 as a woodturning shop in Zurich, this Swiss group of companies developed into an internationally renowned manufacturer of seating furniture. Over the course of its further development, the company's own production facilities and the special artisanal expertise in the areas of upholstery, solid wood processing and surface finishing were systematically expanded. Today, the range of services includes high-quality furniture for office, commercial and private applications, project-specific, made-to-measure furniture (Customized Furniture) and the repair and upcycling of used furniture (Remanufacturing).

From Koblenz, near the border with Germany, the solid wood trading division supplies high-quality materials to all manner of wood-processing firms. Girsberger is also present outside of Switzerland and Germany, with sales companies in several European countries.

Production facilities are located in Bützberg (CH), Endingen (D) and Kraljevci (SRB).

In August 2023 Danielle Quaille became CEO of the international group in the fifth generation of management.

Girsberger has pursued climate-neutral production since 2015

Detailed information about the company can be found at www.girsberger.com
