ALBERTS - SHELF SUPPORTS

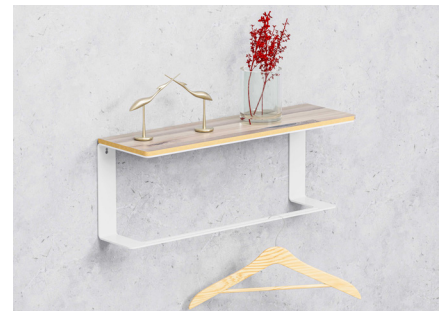

Made to keep an overview

On the wall in studies or living rooms: Decorative shelves solve space problems and help to keep an overview. That's why we at Alberts offer a young range of shelf supports that will redefine your living space: Over 20 models that bring freshness, comfort and durability to a classic product range. From traditional to modern - contrasts create attention. This is also the case with shelves. The alternation between closed and open surfaces, between a rustic structure and a discreet look - all this sets the decisive accents in the living area.

Made of solid steel and powder-coated in various colors, our supports are designed for all standard shelves. The possible applications are diverse and set no limits to your creative freedom. Other models and/or colors can also be ordered from stock. Naturally, we offer sales units tailored to your needs, which are ideal for any online store.

Facts:

- Colors: black matt, white, silver, steel-colored
- Presentation on one element: 1.25m

Decorative shelves, like this DIY project from Alberts, solve space problems and beautify the living space.
