ELEGANT FITTINGS IN BLACK

We are the experts in hardware – after all, we have been dealing with it for over 170 years. Even better: that’s how long we’ve been making fittings ourselves. And that is still the case today. Rooted in Herscheid, in the Sauerland region, we manufacture hardware made in Germany – Our demand on the product? It must not only last, but also look elegant. That’s why we have developed a black range. Black is the trend color of the future in the home and garden. We have picked up on this trend and are meeting the upcoming demand with our range.

The ideal fastening solutions are perfect for construction, crafts and decoration. With a stylish, modern black look, they meet all aesthetic requirements. Their robust construction ensures long-lasting stability. The easy installation makes them attractive for DIY projects as well as for demanding professional applications.

The advantages at a glance:

- Suitable for indoor and outdoor use
- visually appealing
- versatile range
- easy to process
- 15-year guarantee against rusting through

The range in detail

Perforated plate brackets: Robust and versatile brackets, ideal for fastening wooden elements at different angles
