

Egebant Unveils the Egebant SanFoam 821740: Assembly Glove for Precision Work

Turkey, February 2023 - Egebant, a distinguished name in the Turkish work glove industry, is thrilled to introduce its latest innovation, the Egebant SanFoam 821740 Nitrile Foam Assembly Gloves. Engineered with precision and comfort in mind, these gloves represent a breakthrough in hand protection technology, specifically crafted for delicate and intricate tasks.

The Egebant SanFoam 821740 stands out as it is expertly produced by coating thin, breathable, and durable Foam Nitrile on an electrostatic discharge protection featured carbon lining. This unique combination not only ensures exceptional protection but also provides flexibility and a snug fit, making it an ideal choice for tasks that demand precision and dexterity.

Key Features of the Egebant SanFoam 821740 Nitrile Foam Assembly Gloves:

Liner Material: Carbon-Nylon & Spandex

Liner Colour: Blue & Black Melange

Coating: Foam Nitrile

Wrist Type: Knit Wrist

Design: ½ Grey nitrile foam coated melange liner and knit wrist cuff

Thickness: 1.00 mm

Marking: Transfer Printing

The gloves' flexible structure and ergonomic design make them exceptionally comfortable and conducive to delicate work. Professionals in industries such as assembly, electronics, and precision engineering will appreciate the enhanced grip and ease of handling provided by the Egebant SanFoam 821740.

One of the standout features is its ability to make it easier to hold dry and less oily parts compared to bare hands, enhancing both efficiency and safety in various work environments.

"At Egebant, we are committed to providing innovative solutions that address the unique needs of our customers. The Egebant SanFoam 821740 Nitrile Foam Assembly Gloves exemplify our dedication to creating gloves that offer superior protection and comfort, particularly for intricate tasks," said Ibrahim Hatipoglu, CEO at Egebant.
