

Sustainable Work Gloves: Egebant Introduces Eco-Friendly Solutions with EcoCycle 377731 & 317330 Series

Turkey, February 2024 - Egebant, a leading manufacturer of work gloves in Turkey, is proud to announce the launch of its latest Egebant EcoCycle 377731 & 317330 series. These gloves embody a perfect blend of functionality, durability, and eco-conscious design, representing a significant step towards sustainable and responsible manufacturing.

The Egebant EcoCycle 377731 & 317330 work gloves are engineered with precision, featuring a unique composition of materials to provide optimal performance and comfort. The gloves are crafted by coating thin, breathable, and durable Foam Nitrile on a soft and absorbent lining. This design not only protects against mechanical risks but also ensures uncompromised fingertip sensitivity.

One of the standout features of the EcoCycle 377731 & 317330 series is its commitment to sustainability. With a remarkable 50% recycled content by weight, these gloves are a testament to Egebant's dedication to reducing environmental impact. The recycled Nylon & Spandex liner not only contributes to the gloves' eco-friendly profile but also enhances their overall comfort.

Key Features of Egebant EcoCycle 377731:

Coating Colour: Black

Liner Colour: Green & Black Melange

Liner: Recycled Nylon & Spandex

Coating: Foam Nitrile

Thickness: 0.9 mm

Key Features of Egebant EcoCycle 317330:

Coating Colour: Black

Liner Colour: Black

Liner: Recycled Polyester

Coating: Foam Nitrile

Thickness 0,9 mm

These gloves excel in various working environments, making it significantly easier to handle dry and less oily parts compared to bare hands. The inclusion of an antibacterial additive ensures long-term use without compromising safety, making them an ideal choice for professionals across industries.

Mr. Ibrahim Hatipoglu, CEO of Egebant, expressed enthusiasm about the launch, stating, "The EcoCycle 377731 & 317330 series showcases our commitment to innovation and sustainability. We believe in providing high-quality products that not only meet the rigorous demands of the industry but also contribute to a greener future."
