

ProClick – the redesigned mobility concept for the skilled trades

Market research studies on mobile work show that 71% of tradesmen like to carry tools and consumable materials on a belt.

To satisfy this new trend in skilled crafts and trades, BS Systems GmbH & Co. KG have developed **ProClick**, an innovative Tool Belt system which convinces through intuitive operation, more safety, comfort, and flexibility in the workplace.

A lot of tradespeople these days work mainly mobile. This means that they spend most of their worktime outside of the workshop and on average they visit several building sites or customers, daily. Therefore, tools and construction materials must repeatedly be transported to the area of operation, from the vehicle to the building site and in the evening, back to the workshop. In the course of this a lot of time is lost in preparation, loading, unloading, sorting as well as looking for the correct parts. It is not unusual that several trips must be made before everything necessary is in the area of operation. This is, of course, time that is missing on the construction site or for customers.

ProClick, the newly designed mobility concept from the market leaders in the high-quality system cases segment aims for nothing less than simplifying daily work in the trades sector and making it more productive.

The **ProClick Tool Belt** with Holder forms the basis of the system. The cleverly thought out click connection enables an intuitive, fast, and secure “clicking-on” of the tool belt’s pouches, storage solutions and holders to the Holder. This means everything is at hand, despite you having your hands free. An immense relief, particularly when working on a scaffolding and ladders as well as over your head. When the work operation finishes or if the tool requirements change, the pouches can be released from the Holder using one single fingertip, taken away or simply swapped for another one. This means

awkward threading and unthreading of the belt is a thing of the past, finally.

The belt bags are made of high quality and robust polyethylene fabric and are available in numerous sizes and design variations. The system component **ProClick Tool Bag** builds the bridge to the much-loved L-BOXX System. The high-quality tool bag with its stable metal handle can be clicked onto any L-BOXX. When connected, effortless transport is guaranteed.

BS Systems, has provided renowned original equipment manufacturers as well as specialist retailers and wholesalers to the construction industry with individual solutions. Thanks to the compatibility with the L-BOXX system as well as the connection to Sortimo's van racking systems, the **ProClick** system is creating new standards in tool organization: faster access to tools, better overviews, and even more organization. The system is an investment in the efficiency and productivity of tradespeople and will sustainably change the manner in which tools are organized and transported.

The innovative and cleverly thought-out mobility system **ProClick** from the house of BS Systems, has revolutionized the way in which professional tradespeople carry their tools and ensures more safety, comfort, and flexibility on the construction site and in the daily work routine in skilled crafts and trades. It is the perfect solution for the professional tradesperson to have the right tool always at hand, whether in the workshop or on the building site: mobile, reliable, and safe.

Further information can be found on the website www.proclick.de or www.L-BOXX.com and can be requested from the manufacturer by email under info@L-BOXX.de as well as by telephone under 08291/850-2300.

About:

BS Systems GmbH & Co. KG from Zusmarshausen is a joint company of Robert Bosch GmbH and Sortimo International GmbH. The market leader in the high-quality plastic system cases segment, well known for the L-BOXX brand, is opening up new market segments with the ProClick product line. In the meantime, about 50 employees are working on continuous further development and sales of the intelligent and innovative mobility systems L-BOXX and ProClick. BS Systems can meanwhile boast over 350 well-known OEM producers as their customers, who utilize the packaging and transport solutions as partner companies. Up to now, over 40 million BOXXes sold means that the company can self-confidently describe itself as the market leader in the segment of high-quality system cases and can count the Who's Who of the tool industry among its customers.
