

BRUSHLESS SERIES

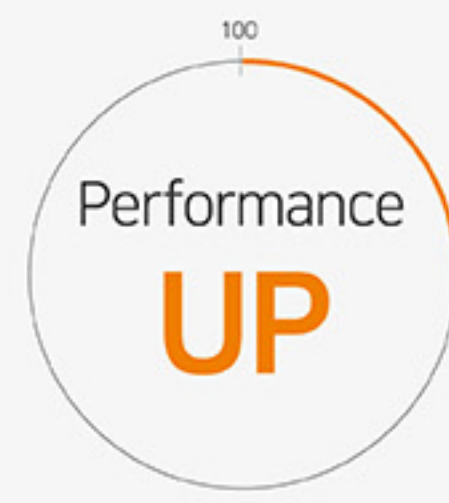

BL14P50

14.4V Electric Pruning Shears

High Performance Brushless Motor for long-lasting power

Conventional brush motors have a shorter lifespan due to wear and heat caused by direct contact with carbon brushes. Aimsak's brushless motors, equipped with electric control and cooling technology, offer extended durability and enhanced power output for power tools.

ALC 3540T

Multi-bay charger with 3 battery ports - sequential charging

Compact Design, with only 960g

Lightweight and compact design (960g) reduces fatigue during prolonged use.

Multi-bay charger with 3-battery ports allows all-day use of the tool

Ergonomic i-LESS grip with a compact 40mm diameter

40mm diameter i LESS Grip handle enables comfortable and safe operation.

High-Power Cutting with Premium Steel Blade

Top-notch steel blade allows safer and faster operation.

2 Blade Opening Angle Modes

Switch the opening angle between normal open mode (Ø32mm) and short open mode (Ø25mm) according to the branches to be cut.

Battery Fuel Gauge

Check the remaining battery level easily with battery fuel gauge.

	Level 3 Over 80%		Level 1 20~50% Left
	Level 2 50~80% Left		Level 0 Below 20%

Dual Safety Protection System

Aimsak power tools are equipped with a dual safety protection system that includes a switch for overcharging, overcurrent, undervoltage, and over-discharging protection, as well as batteries integrated with a PCM (Protection Circuit Module) for overcharging, undervoltage, and over-discharging protection. This dual safety system ensures longer battery life and excellent operational performance.
