

Worm-Drive Hose Clamps

Tough Beyond Standard

Gas

Automotive

Hardware/DIY

Industrial

NPP Hose Clamps are manufactured at the best standard, using only selected premium grade material. All products are carefully checked to their standards throughout the production and packing processes. NPP Hose Clamps feature an extra strong housing, smooth underside band and continuous threaded band.

Extra strong one-piece pressed housing

add strength and stability

Full thread band

continuous threaded band allowing extra flexibility when adjusting the clamp working range

NPP-W1 Mild Steel Zinc

the most popular worm drive hose clamp that suits daily requirement.

Finishing : Mild Steel, Zinc Plated

Corrosion Resistance : > 168 hours NSS test

Smooth band underside

for better hose protection

Sturdy & Unique tail locking

all welded sturdy steel wing, featuring higher durability when twisted and longer useful life

NPP-W1-WING Wing Screw Clamp

specially designed for ease of use. Ideally for using with garden hoses and general applications where there is a requirement for frequently removed hose.

Finishing : Mild Steel, Zinc Plated

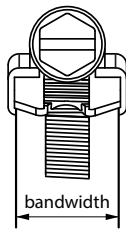

NPP-W3 Stainless Steel 430

all parts are made from stainless steel 430. Ideally suited to applications with high pressure or high mechanical loads where longer corrosion resistance is required e.g. automotive.

Finishing : Stainless Steel 430

Fastening Screw : 7 mm screw (hex head)
