PNEUMATIC TOOLS

ABOUT AIRBOSS

AIRBOSS AIR TOOLS CO., LTD. is AirBoss pneumatic tools are available to meet the needs of different customer groups. Three differently positioned pneumatic wrenches are produced; Divided into 1.The highest quality and light weight industrial grade (exclusive patented product) 2.Industrial grade. 3.An affordable professional grade designed for auto repair.

AIRBOSS lightweight products are different from the common non-environmental plastic steel materials in the market. AIRBOSS lightweight series is made of exclusive patents for magnesium alloy lightweight products, featuring lightweight, high precision, high pressure resistance, long service life and all environmentally friendly materials. The exclusive patent extends the life by 100%, which is equivalent to reducing the consumer cost. The product weight reduced 20%. Lastly, we have invented the world's shortest pneumatic wrench.

AG Series

- Suitable for heavy duty work & industrial use
- Durable & Reliable
- High performance
- Low vibration
- Low noise
- High concentricity accuracy
- Safety design for over-load-speed
- Ideal for shipbuilding, petrochemical industry, rail transit industry, and aerospace industry etc

SG Series

- Ergonomic & streamlined non-slip design
- Imported high-end bearing with high precision and stable features
- Low vibration
- Rich in sizes, applicable in tight and narrow spaces
- Ideal for shipbuilding, petrochemical industry, rail transit industry, and aerospace industry etc
- High concentricity accuracy
- Low noise

AIR SUPPLY SYSTEM

- To ensure the product life, we strongly recommend setting three-point combination and air drier in the air compressor pipeline.
- Be sure to discharge the water from the air compressor and air filter.
- Check the pneumatic tools every day. Before use, add appropriate lubricant to air inlet. No high viscose lubricant or the power of the tools may decrease.
- Fill only little high temperature lubricant into the front clutch every week to ensure proper lubricating and resistance to abrasion.
- The applicable air pressure is 6.3 kg/cm² (90 psi), too high or too low air pressure may influence the performance and product life.
- Please wear safe glasses before operation.

THREAD NPT (USA) PF (Europe) BSPP/BSPT (Europe) PT (Asia)
