

Unique Rodless Caulking Gun for narrow space uses!

SSF is a professional caulking gun manufacturer, owning multi-patents. The Rodless Caulking gun is the unique design, which is suitable working around narrow spaces. It has a huge differences from the traditional caulking gun.

The rodless caulk guns remove the ladder hook and install this functions on the top of the carriage. A steel belt replace the rod puller so that users can smoothly push and pull the button. When users are working at narrow spaces, they won't be disturbed by the ladder hook. It's ergonomic and easy to operate. When working around corners, the caulking gun won't get stuck. It's suitable for low viscosity materials such as silicone and latex. It's equipped with a built-in belt hook. With it, users can hang it on your belt when not in use.

We have three types of rodless caulking gun.

If you prefer the metal material, you can refer our SSF-188-1 (please refer to the picture 1.1) and SSF-168-1 (please refer to picture to picture 1.2). Its carriage is made with high quality steel riveted.

SSF-168 rodless gun is equipped with **patented release pressure system**. It will automatically release the pressure once users press the upper part of the trigger. When you temporarily stop applying caulk, you can press the upper trigger to stop sealants dripping down. Furthermore, it has **ergonomic operation and balanced force body design**. Its handle is located in the middle of the caulk gun body. It's
