

## SUPERIOR SAFETY STANDARD IN CHILD CAR SEATS – explore lionelo models

Ensuring safety during travel is our top priority at lionelo. That is why our child car seats are designed to provide maximum protection in all conditions. All models are approved to the stringent i-Size standard and fulfil the highest quality requirements. The extensive variety of options allows the seat to be adjusted not only to the child's height but also to the installation method preferred by parents.

When looking for a new child car seat, consider **Harper i-Size**, which is suitable for children within the **height range of 76 to 150 cm**. The model distinguishes itself from competitors with **advanced safety systems** – including its **PP shell and EPS-reinforced headrest**. Studies show that car seat performance is greatly influenced by proper installation. This is why Harper i-Size incorporates a **extra wedge beneath its base to ensure a snug fit on the car's bench seat**. Harper i-Size is installed using **the ISOFIX system and the Top Tether strap** featuring special colour-changing **indicators to notify the caregiver when the seat is properly secured**. For added comfort and safety, **the seat straps can be utilised until the child reaches a height of 125 cm**, ensuring optimal protection.

Among our new offerings, **Harmony i-Size** is a particular stand-out. Alongside its **attractive design**, it boasts the **innovative Side Impact Guard protection system** designed to **reduce the gap between the door and the seat, helping to absorb impact forces**. An additional safety feature is the **Buckle Alarm integrated into the buckle** to notify parents when their child unbuckles the straps. **The seat structure incorporates steel elements for reinforcement**, and **the headrest features Tri-Guard technology**, which combines **three layers of protective materials, including Memory Foam**. Harmony i-Size is an example of a **4-in-1 model** that **stands**

**out for its exceptional longevity.** The child seat is installed by means of the **ISOFIX system and stabilising leg.** Daily comfort is guaranteed by the **360° EasyTurn swivel base** and the **natural bamboo material** which promotes excellent air circulation.

lionelo is a Polish brand that specialises in baby products. All our activities are centred around the idea of **everyday caring** – to assist parents with the day-to-day care of their child. lionelo products support caregivers not only during trips but also throughout daily walks, meal preparation, and playtime. Our broad and diverse product selection ensures that parents can find nearly everything they need for their baby. From **the first child seat and travel cot to high chairs and even electric breast pumps – we have got you covered.**
