

## MODERN PRAMS AND STROLLERS FROM LIONELO – check out what is new!

At lionelo, we prioritise high quality and functionality in the development of our products. We are committed to introducing solutions focused on **everyday caring** – to assist parents with the day-to-day care of their child. In this context, our products serve as ‘silent helpers’, providing support during night wakings, morning walks, and evening bedtime routines. Our products are designed to seamlessly integrate into family life, becoming an essential and natural part of daily activities.

Among other products, we offer our customers a **wide range of prams, strollers, and 3-in-1 or 2-in-1 models**, which include a spacious carrycot for the smallest children.

### **Layla 3-in-1 – innovative solutions for maximum ergonomics**

When exploring our new products, be sure to pay attention to **Layla 3-in-1 and 2-in-1** models which seamlessly blend high functionality with an appealing design. What sets our product apart is, above all, a **modern carrycot featuring 3D panoramic ventilation** to ensure optimal conditions inside for the baby. Another highlight is the **comfortable mattress with AiryDots ventilation channels**, which further promotes air circulation and prevents your little one from sweating. Comfort during everyday use is further enhanced by the **all-terrain wheels** which, combined with the cushioning system, handle bumps and rough surfaces with ease.

Layla is a **multifunctional pram** that also comes with a **practical seat**. When your little one outgrows the carrycot, you can use the same frame and transform the pram into a practical stroller. In this version, we have also prioritised comfort by including an **extra-large (XXL) seat** that offers up to **95 cm of usable space** when unfolded, giving your child ample room to sleep.

The 3-in-1 version also comes with **Astrid i-Size car seat**, which is ideal as the first carrier. Be sure to pay attention to its high safety standard validated by tests performed at the **German ADAC Institute!** The seat shell is constructed from energy-absorbing materials, and the **headrest is reinforced with Memory Foam**, which is excellent at absorbing impact forces. The seat is suitable for universal fitting with the **car safety belts**, but there is also an optional dedicated **ISOFIX base** available for purchase to make seat installation easier every time.

In addition to prams and strollers, the lionelo range includes a diverse selection of car seats, travel cots, and high chairs. It is also important to highlight lionelo care products – breast pumps, baby monitors, and bottle warmers – which provide invaluable support to parents in their daily baby care routines.
