## Baobaby soft sole baby shoes

Eco-friendly ♥ Premium ♥ Handcrafted ♥ Comfortable

Babies first steps are one of the most exciting babies milestones. Parents can now make right decision and take care of their baby and nature at the same time.

### Baobaby shoes highlights

Baobaby soft sole shoes are designed and handcrafted in Croatia, EU and made of premium, chromium-free, vegetable-tanned leather. Baobaby leather is certified as natural by IVN.

That means that the process of production, chemicals use and wastewater handling is evaluated to prove that leather is 100% natural, produced in environmentally and socially friendly way.

Baobaby believes in local, sustainable production and reducing its carbon footprint – that is why Baobaby shoes are made locally in Croatia.

### Principles of barefoot walking

Orthopedists agree that barefoot walking ensures better development of feet muscles and bones, as well as proprioception and stability.

That's why design of Baobaby shoes incorporates following principles:

- thin, flat, soft and flexible, anti-slip sole that enables feeling all sensory information
- wide front part that follows feet curves and keeps toes free
- breathable and natural material safe for babies skin and padded elastic band around the ankle to keep shoes snugly on the feet.

### Loved by children

Baobaby shoes are tailored to children's needs, ensuring freedom of feet movement while protecting and keeping them safe.

They are comfortable & breathable with lovely design which makes them childrens favourite choice.
