Candide unveils its Cotton Baby Mattress: a healthy, durable, and skin-friendly sleep solution for delicate newborns

Candide, the renowned French brand specializing in baby care and comfort, continues to innovate in support of infant well-being and parental peace of mind. With its new Cotton Baby Mattress, Candide offers a product that is not only comfortable and long-lasting, but also eco-conscious—carefully designed to meet the needs of babies' sensitive skin.

Naturally healthy comfort

Made from recycled cotton fibers, a natural, durable, and hypoallergenic material, the Cotton Mattress meets all the essential requirements for newborns: safety, softness, and breathability. Free from chemical treatments, it complies with the NF EN 16890 safety standard, ensuring impeccable hygiene. A reassuring choice for parents who want to protect their baby's health from the very first nights.

Ideal support for growing babies

With a density of 40 kg/m³, this mattress provides firm, balanced support, perfectly suited to a baby's body shape. This firmness encourages healthy posture and promotes restorative sleep, crucial to your baby's development.

Optimal breathability

Naturally breathable, cotton effectively regulates moisture and reduces heat buildup. The result is a stable, comfortable sleeping temperature throughout the night, limiting sweating and creating a dry, healthy sleep environment—even in warmer conditions.

Practical, hygienic, and easy to care for

Featuring a 360° removable cover, the mattress is easy to clean. Simply unzip and machine wash at 30°C to maintain optimal hygiene. Cleverly designed, the mattress can also be used on its underside during washing, so baby continues to enjoy restful nights without interruption.
