

## Press Release

2025

### **Multirelax Colombes by Candide: The essential 3-in-1 companion for a serene pregnancy, comfortable feeding, and soft beginnings with baby.**

Candide, a French brand specializing in the comfort of little ones and young parents, expands its babycare range with the Multirelax Colombes—a smart, adaptable, and ultra-comfortable maternity pillow designed to support mothers through pregnancy, breastfeeding, and baby's early months.

#### **Optimal comfort during pregnancy**

As pregnancy progresses, comfort becomes a daily necessity. Thanks to its microbead filling and soft, stretchy jersey fabric, the Multirelax Colombes adapts to all positions: placed under the belly for support when sitting, behind the back to relieve lumbar pressure, or between the legs at night to promote more restful sleep.

#### **Perfect for breastfeeding or bottle-feeding**

From birth, the Multirelax transforms into an ergonomic nursing pillow. It ensures baby is well-positioned and supports the parent's arms and shoulders during feeds. Nestled comfortably in the pillow's curve, baby enjoys calm, cozy moments—perfect for bonding in total comfort.

#### **Patented innovation: the pillow that becomes a baby lounger**

The Multirelax by Candide is the first patented maternity pillow that also serves as a baby lounger. Simply unzip the built-in support harness and place baby inside. Snap fasteners keep baby safely in position. The adjustable support adapts to baby's body and can be used from birth up to 6 months.

#### **Soft, stretchy, and comfortable**

Made from ultra-soft jersey with a stretchy lining containing elastane, the Multirelax Colombes is flexible, gentle to the touch, and incredibly comfortable. It molds to your needs and positions throughout the day—your everyday comfort companion.
