

Meet the Hamaton Team at THE TIRE COLOGNE 2026

Mandated requirements for TPMS continue to develop, establishing the technology as a safety-critical element of vehicle maintenance in both the passenger and commercial vehicle sectors.

Hamaton remains at the forefront of TPMS development, offering a comprehensive range of solutions for all vehicle types. Join us at Stand E-035 (Hall 8) to explore Hamaton's range of sensors, diagnostic tools and service parts, and learn more about the latest compliance mandates and revenue opportunities TPMS presents to the automotive aftermarket sector.

Passenger Vehicle TPMS: Designed to prevent tyre blowouts, improve fuel efficiency and extend tyre life, Hamaton's innovative range includes OE-quality sensors programmable via ATEQ-powered tools to cutting-edge NFC sensors configured via smartphone and dedicated BLE sensors for Tesla.

TPMS Solutions for Commercial Vehicles: Mandated for commercial vehicles since 2024, Hamaton's range of Truck TPMS solutions are dedicated to trucks, trailers, semi-trailers, coaches, and buses. Designed to withstand heavy-duty environments and available in valve-mounted and band-mounted formats, they integrate seamlessly into existing tyre and wheel maintenance procedures, helping to drive workshop efficiency and fleet safety.

Diagnostic Tools to Maximise TPMS Service & Maintenance: Explore our latest tablet and handheld diagnostic tools, designed to simplify sensor programming and relearn procedures for the newest vehicle models and sensor technologies. With devices available for both passenger and commercial vehicles, you'll find the expertise needed to navigate TPMS diagnostics, regardless of your vehicle application.

Technical Expertise & Know-How: TPMS compliance and trends are driven by data and regulation. Our technical specialists will be on hand to help you understand current and upcoming TPMS mandates across Europe, ensuring your business remains fully compliant and ready to face real-world workshop challenges with confidence.

Plus, see Hamaton's Commercial Vehicle TPMS Technology in Action.

Join Hamaton at the BRV stage (Stand B-020, Hall 8) each day of the show to boost your knowledge of commercial vehicle TPMS and bridge the gap between theory and practice. These live sessions will demonstrate TPMS installation, programming, and maintenance for heavy-duty wheels, while highlighting key safety considerations and cost-saving benefits for fleet managers.

We look forward to seeing you in Cologne! For more information or to book a specific meeting time with our team, contact us by visiting www.hamaton-tpms.com.
